## **LEUCOPHYLLUM FRUTESCENS**

**The *Leucophyllum frutescens*, known as Texas Sage, is a show-stopping shrub famous for its silvery-grey foliage and explosive purple blooms. Often called the "Barometer Bush," it bursts into flower in response to humidity, creating a vivid contrast against its soft, shimmering leaves. This exceptionally drought-tolerant and sun-loving plant is perfect for low-maintenance hedges or as a standout ornamental piece in any water-wise landscape.**

## **WEDELIA TRILOBATA**

**The *Wedelia trilobata*, or Singapore Daisy, is a vigorous evergreen ground cover that forms a lush, carpet-like mat of glossy green foliage. It is prized for its cheerful, bright yellow daisy-like flowers that bloom almost year-round, even in challenging conditions. Highly drought-tolerant and fast-growing, it is the perfect solution for suppressing weeds, stabilizing slopes, or adding a vibrant burst of gold to sun-drenched landscapes.**
